CITY WIDE MORATORIUM PETITION

We, the undersigned, request a moratorium on any further annexations or large developments in the city of Philomath until there has been an impact analysis and budget considerations to evaluate the following:

Impacts on transportation – including costs of extensive road upgrades

Road congestion and safety – special consideration to policing and fire department needs

Water availability beyond current usage

Impacts on schools, police and fire staffing, and our library systems. These will not be covered by any System Development Charges collected from developers, but will have to be funded by city funds, future taxes and additional bond measures.

We further request that the Philomath Charter be revised and returned to its original intent, to allow the citizens to be heard through the voting process, when considering all future annexations or large developments as well as rezoning of industrial areas (including former mill sites) into residential areas of any density level.
